Hold Down Stakes

Made in Australia

www.antelco.com

Hold Down Stakes

Antelco's range of hold down stakes are designed to secure irrigation tubing in landscape and home garden applications. Featuring the signature Asta® triangle base stake, Antelco's hold down stakes offer excellent retention in most soil types.

The Asta® Hold-Down Stake is suitable for inline drip and LDPE lateral tube installations. The single hold down hook accommodates a range of tube sizes up to 22 mm OD.

The Asta® Hold-Down Stake is designed with a broad flat top surface to ensure the stake resists bending by transferring force applied during installation directly to the stake's point of entry into the soil.

The Asta® Clip Stake is ideally suited to drippers and other micro irrigation installations. The Asta® Clip Stake suits two tube sizes; 4 mm x 6 mm and 4 mm x 7 mm (maximum 8 mm OD).

Features

- ✓ Asta® Hold-Down Stake suits common irrigation tube sizes up to 22 mm OD
- ✓ Broad flat top surface to prevent stake bending installation
- ✓ Asta® Clip Stake suits two micro tube sizes: 4 mm x 6 mm and 4 mm x 7 mm (maximum 8 mm OD)
- ✓ Distinctive Asta® triangle base stake for maximum stability in most soil types
- ✓ Resistant to common agricultural chemicals and fertilisers

Applications

Nurseries, shade houses, tree lots and landscape applications.

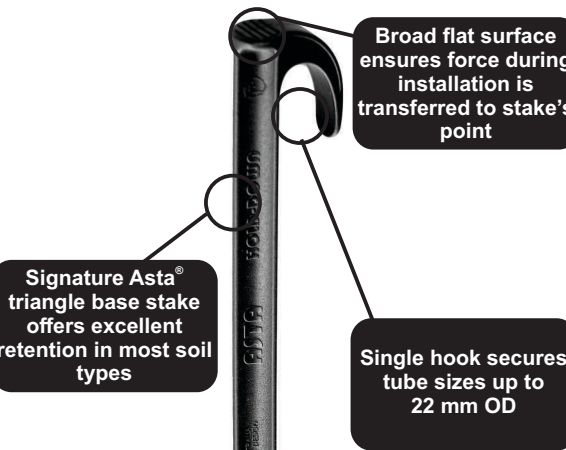

Hold Down Stakes

Asta® Hold-Down Stake

Features

- Suited to inline drip and LDPE lateral tube installations
- Single hold down hook to accommodate common irrigation tube sizes up to 22 mm OD.
