Accessory Products — Stainless Steel Clamps

Antelco has partnered with Oetiker to offer a flexible range of secure stainless steel clamps to suit irrigation systems.

Clamp sizes have been specifically selected to suit the irrigation market.

The broader clamping range allows one clamp to suit multiple tube sizes, reducing the number of clamps required to suit all irrigation tube sizes.

Features

- Quick & easy installation
- Stamped size for easy identification
- Install using a range of crimping tools
- Robust interlocking design
- StepLess® design overlaps on the inner circumference of the clamp eliminating steps and providing a full 360° clamping force
- Screwless one piece clamp
- 7mm clamp width for secure seal

Applications

Vineyards, agriculture & commercial irrigation and landscape applications. Suits lateral tubing, dripline tube and LDPE pipe.

Accessory Products

Dawn Industries Crimpers CT108

Forged from high quality tool steel with soft handle coverings for reduced hand fatigue.

Suitable for installing or removing clamps and also handy for cutting wire strapping and pulling nails.

2 in 1 Punch & Cutter 42375

Designed for cutting LDPE and CVT tubing up to 21mm OD and punching holes into tubing for emitters and micro fittings.

Angled piercing blade reduces cutting force.

Punch removes wad for clean round holes.

Compound Action Pincers 70638

Robust strength and high closing force requiring less hand strength to achieve safe and simple closure.

Specifically designed for use where higher volumes of clamps are used, providing comfort and reducing hand fatigue.

Compound action for faster clamp installation.

Dawn Industries KwikCut™ SL135-0-SS

Cuts Polyethylene and thin walled PVC pipe, hose and tube.

Fibreglass reinforced nylon handles for durability.

Standard or Spring Action models available
